# GOLDSTAR™ Service

**Advanced Cockroach Management Service. (Pest covered - Cockroaches, Red ants, Black ants, Silverfish & Spiders)**

**Cockroaches:** - Most common species found in India, *Blattella germanica* (**German Cockroach**)-Most common in the kitchens, multiplies very fast in short time span. *Periplaneta americana* (**American Cockroach**) - These cockroaches habitat in sewers and manholes. *Supella longipalpis* (**Brown banded Cockroach**) Similar to German cockroaches found in homes.

## Diseases transmitted by Cockroaches

- Found harbouring disease causing pathogens of **salmonella, staphylococcus, streptococcus, coliform and other bacterial pathogens.**
- Allergens found in cockroaches can lead to Asthma.

**Ants:-** Social insects feed on split food & drink. Some of the species cause painful bites and stings.

**Silverfish:-** Nocturnal in habit, feed on household articles containing starch such as fabrics and book bindings.

**Spiders:-** Mostly found in homes, warehouses, stores. They build cobwebs for shelter to capture the pray, this can lead to

contamination of food and destruction of ambiance. Spiders have been reported to bite with painful consequences and some necrosis.

**Goldstar™ Treatment** includes application of gel in micro spots and spraying of odourless insecticides.

- Economical, effective and long lasting
- Odourless
- No need to vacate the premises.
- Target pest specific, Non Messy and no chaos.
