# ROADSTAR™ SERVICE

***“Pair of rat can multiply to 800 1200 nos. in one year.”***

Rodents are mammals and are often more intelligent than humans. They have very good sense of smell, touch and an acute sense of hearing. Rodents have continuously growing incisors, hence to keep them under check they have the habit of gnawing cables, boxes, hard surfaces etc. Rodents destroy more than what they feed. They are also responsible for being the cause of diseases like **Plague, Leptospirosis, Salmonellosis, Rat bite fever, Rabies etc.**

**Rodastar™ Service** has been targeted to provide the total and effective control of rodent infestations, rats, mice & bandicoots.

## Features and Benefits:

- Inspecting premises to provide an audit on the nature and extent of infestation.
- The baits are placed in strategic locations where the rodents frequently visit.
- Use of Glue traps is a part of rodent pest management operation and will be carried out wherever needed.
- Periodic replenishment of baits and resetting of traps.
- Our technical experts also suggest the sanitation and rodent proofing to prevent the re-infestation.
